Lacquer & Wash Thinner

Acetone

NWSACETONE-5G 5 Gallon Acetone

Acetone is the strongest and fastest evaporating solvent around. Acetone will easily remove sticky residue on glass and porcelain left by stickers and labels, and will clean lacquer tools well. As acetone is highly volatile, it will not work as a thinner for most oil paints and coatings. Mixing with water dilutes strength and slows evaporation rate. Acetone is used in auto body shops and boatyards, for auto body repair, fiberglass hull repair and other epoxy or fiberglass projects.

Note: Too strong for use as a coating solvent. It will attack plastics, synthetic fabrics etc. Is non-photochemically reactive. Acetone is a colorless liquid with a mildly pungent odor. Cannot be shipped UPS or US Mail.

Laquer Thinner

NWSHI-5G 5 Gallon Laquer Thinner

When selecting a thinner for use with your paint or varnish project, be aware that different lacquer thinners have different proportions of acetone.

Use the minimum amount of thinner by gradually adding to the lacquer. You know you've added enough when the paint flows freely. If too much thinner is added, the paint will run and drip and otherwise ruin your chances for the desired smooth, high gloss finish lacquer is known for. Other uses for the lacquer thinner include cleaning and flushing paint spraying equipment. Great also for cleaning painting tools like brushes, sprayers, rollers, and applicators.

Wash Thinner

NWSWT-5G 5 Gallon Wash Thinner

Wash Cleaner & Thinner to clean all equipment and brushes as soon after use as practical.
